Dr. Nancy Halpern is a registered patent attorney and Chair of the firm's [Animal Law Practice](#). She represents clients in intellectual property and veterinarian pharmaceuticals. Dr. Halpern also represents animal owners, animal-related businesses, veterinarians, biomedical research facilities, farmers and trade associations in issues related to the complex patchwork of local, state and federal laws and regulations governing the humane use of animals. A licensed veterinarian in the State of New Jersey, Dr. Halpern previously served as Director of the Division of Animal Health for the New Jersey Department of Agriculture and New Jersey's State Veterinarian and served on the State Board of Veterinary Medicine Examiners (SBVME) for nearly a decade. In these posts, she was responsible for the state's emergency response regarding animal care concerns in the event of natural or man-made disasters; supervision of the sole animal health diagnostic laboratory in New Jersey and implementation of regulatory and statutory provisions governing animal care, well-being and safety as well as animal disease surveillance and control.

Dr. Halpern serves on the Board of Directors for Americans for Medical Progress and the New Jersey Association for Biomedical Research. She has represented the American Veterinary Medical Association and other trade associations in legislative and regulatory matters (excluding services covered by the Lobbying Disclosure Act, 2 U.S.C. § 1601 et seq.), represents veterinarians when acquiring or selling their practices and when facing regulatory challenges nationwide. She also provides statutory and regulatory analysis for trade associations and animal-related businesses and represents businesses, from farms to pharmaceutical companies, during their interactions with governmental regulators.

Beyond Fox Rothschild

Dr. Halpern is certified in EPA Hazardous Materials Incident Response Operations (2006) and has completed USDA Tuberculosis Epidemiology Training (2005) and management-level training for Preparedness and Response to Agricultural Terrorism (2005). She has also completed the IS-700 Introduction to NIMS (2005), presented by FEMA.

Dr. Halpern speaks frequently about the legal issues affecting animal-related industries, including issues of animal welfare and the shifting laws governing animal ownership and use. She has delivered presentations recently at the annual meeting of the American College of Laboratory Medicine, the New Jersey Association for Biomedical Research's annual IACUC Conference, the region's premier training event for Institutional Animal Care and Use Committee members and managers, laboratory animal veterinarians, animal welfare compliance specialists, laboratory animal care staff and other research team members and has often presented at the annual meeting of the American Veterinary Medical Law Association.

In addition, Dr. Halpern provides animal-related pro bono legal services. Most recently, she has provided assistance to:

- The New Jersey Bar Foundation, by editing mock trial documents that dealt with the death of a dog
- The family of an adopted dog, in recouping their adoption fee after they spent more than \$4,000 on surgery to repair their dog's heart condition, which was not disclosed to them by the rescue group from which the dog was adopted
- The National Animal Interest Alliance (NAIA), by drafting an amicus brief in a federal lawsuit in which NAIA claimed that a city ordinance banning the sale of dogs was preempted by state law
